# TECTA TEXTURE

## UV ENGINEERED SLATE

30 YEAR COLOUR &  
STRUCTURAL GUARANTEE\*

# CEDRAL TECTA IS A NEW INNOVATION IN FIBRE CEMENT SLATES – IT'S THE ONLY SLATE TO BE COATED USING UV TECHNOLOGY.

Whether you're building your dream home or restoring an existing one, every decision matters - especially what protects it from the elements. Cedral TECTA Texture offers the refined, uniform finish of natural slate with none of the unpredictability, perfect for sleek rooflines or integrated roof-facade design continuity

Cedral TECTA Texture UV Engineered slate, is crafted using a patented multi-step UV curing process to create a more sustainable, reliable and hard-wearing slate for your project.

By curing with UV light instead of energy-intensive heating and cooling processes, TECTA slate delivers ultra-durable matt coating that resists fading, scratches and harsh weather, all without excessive energy use. The result is a premium finish that delivers a stronger, more durable, and environmentally friendly roofing and facade solution.

Weather-proof, fade and scratch resistant, Cedral TECTA is the best, most resilient premium alternative to natural slate.

## 30 YEAR COLOUR & STRUCTURAL GUARANTEE\*

Cedral Tecta Texture slates are manufactured in France in accordance with the European Norm EN 492:2012.

Use: Tecta Texture slates are for use on pitched roofs, or hung vertically in accordance with the fixing of fibre cement slates as specified in the Irish Code of Practice for Slating and Tiling SR82, or the British Code of Practice for Slating and Tiling BS5534:2014 and BS8000: Part 6. Reference should also be made to Cedral's Fibre Cement Slates Fixing Guide.

Structural Guarantee: Tecta Texture slates meet the requirements of EN 492:2012 and when fixed in accordance with SR82 and BS5534:2014 carry a 30 year structural guarantee from the date of manufacture. If during the period of guarantee the product is found not to conform to the stated properties in the Product Standard EN492, the affected slates will be replaced at no cost.

Colourisation: The colourisation system used on Tecta Slate is a multi-stage UV-curing process, where a film of UV paint is applied to the fibre cement substrate and then textured using an Excimer UV lamp in a nitrogen-rich environment, before being fully cured with standard UV lamps creating a premium matt finish.

Weathering: On exposure the slate surface and/or its coating will be affected by weathering which may vary with site location, aspect, pitch of roof and duration of exposure. Any deterioration in this respect shall not detract from the mechanical and physical characteristics as specified in the standard or from the function of the slate as a durable element.

Colour Guarantee: Etex Ireland Limited guarantees that the Cedral Tecta Texture slate will not suffer significant and permanent change in colour for a period of 30 years from the date of purchase subject to the following conditions and limitations: The appearance and consistency of the colour is to be assessed from the ground and from a reasonable distance.

Over time as the slate ages a reduction in the intensity of colour or some fading is to be expected, and any such change does not constitute significant colour change within the meaning of this colour guarantee.

Over time rainwater may gradually deposit sediment on the slate and a white border may appear around the edges of the slate. This does not constitute significant colour change within the meaning of this colour guarantee.

Different aspects of a roof will be exposed differently to weather and therefore over time a variation in colour may occur between the different roof aspects. This does not constitute significant colour change within the meaning of this colour guarantee.

Weather, moss and lichen can cause shallow cracks and indentations to appear on the surface of a slate. This does not constitute significant colour change and does not affect the structural integrity of the slates.

Damage caused to the surface of a slate during handling, installation, cleaning or otherwise is excluded from this colour guarantee. The obligation of Etex Ireland Limited pursuant to this colour guarantee is limited to a refund of the purchase price paid for the slate and is further limited as follows; in years 1 to 10 after purchase - 100% of the purchase price will be refunded, in years 11 to 20 after purchase – 75% of the purchase price will be refunded and in years 21 to 30 after purchase – 50% of the purchase price will be refunded. This colour guarantee does not extend to any other costs or expenses whatsoever to include but not limited to; the cost of removal and replacement of the slate.

This colour guarantee is personal to the first end user of the slate and is non transferrable.

THIS COLOUR GUARANTEE IS SEPARATE, INDEPENDENT OF AND ADDITIONAL TO THE STATUTORY RIGHTS OF A CONSUMER.
